**Subject:** CASPA & DSC Meeting - 18.02.2021

**Minutes:**

**1. North Star**

- a. Connection to CQC and NHSX
- b. What are they planning to do after March?
- c. Social Care Programme coming to an end.
- d. Who do they think will take over the innovation role?

Update to the last point - information to be shared by people when needed - ideally, make it more succinct.

Include something along the lines of: If something is asked of social care it must be appropriate for social care. Social care must be influential on determining any systems that are implemented in social care. Nothing about us without us.

After March funding has been agreed about communicating DSPT to the sector, but nothing beyond this has been agreed.

No one yet knows what will happen in the future.

**2. Capacity Tracker**

- a. Review roadmap

Action: DSC to raise with CPA to request Capacity Tracker allow APIs to be populated by care systems.

**3. Review the latest list of interoperability projects**

- a. Anything new to report?

Skills to make informed purchasing decisions is a barrier to going digital.
